Launch

GUI (Windows only)

> `smdoctor_gui.bat`

Command Line Windows

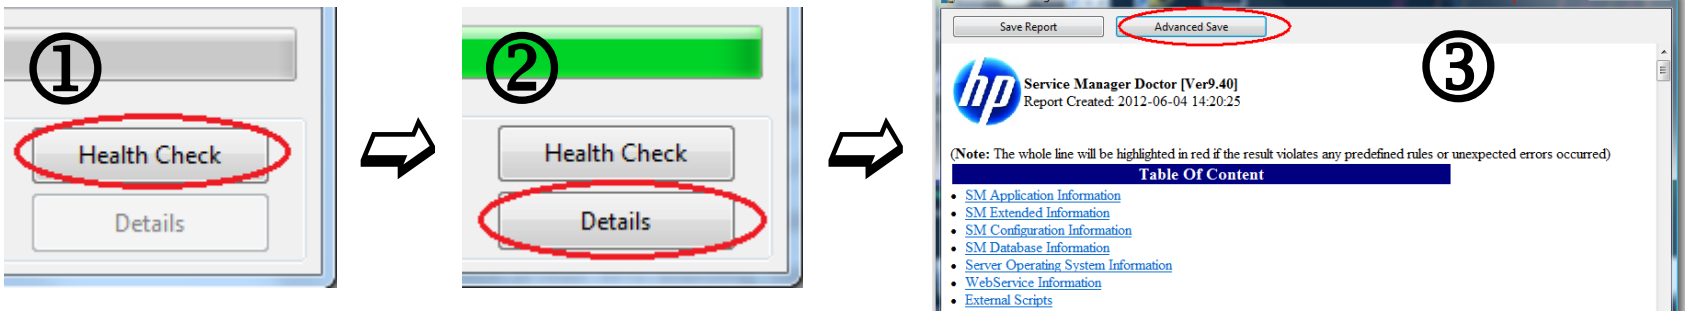
> `smdoctor.bat`

Command Line Unix

$ `smdoctor.sh`

⚠ If you cannot run a script, change permissions by running `chmod 755 smdoctor.sh`

Use GUI



Use Command Line

```
********   Welcome to Service Manager Doctor   ********
******                 Version 9.40                ******
> run -all -zip
…
Total : 15s
> exit
```

Report and logs will be saved as `sm_doctor_saved.zip` in the current directory.

DO	DON'T
☑ Make sure SM Doctor is unzipped under SM Server directory ☑ Kill and restart SM Doctor if it hangs ☑ Collect detailed steps to reproduce along with `sm_doctor.log` when reporting a problem ☑ Consult with User Guide for detailed description of command line mode	☒ Run GUI and Command Line at the same time ☒ Modify `SM_Configuration_Rule.xml` file
